## Claim Remarks

estimate at 101% of acv.

07/03/2013 Inspected insured's 2013 Audi A4 at Autobahn Collision Center at approx 11:45 am., Met with Johnny at shop. Noted damage to rear of vehicle, approximate repair time is 28 days.

This was a moderate impact to the rear of customer's vehicle with no airbag deployment. Vehicle was parked in a tight area difficult to see, shop indicated they could not get car started to move it. When I tried to get odometer reading, I did get the vehicle started, tried to move it forward it inched forward, tried to move back

and reverse gear would not work. Also noted that the electronic instrumentation (odometer) was black and I could not get reading (obtained approx from owner).

In addition, after a couple of minutes, the engine started rocking back and forth quite severely indicating dmg to motor mounts or engine, then engine died.

I went over vehicle with shop and discussed repair/open items.

I wrote estimate with all new oem parts, added for jiggling and r&i of items for jig set up, transmission as well as motor mounts to determine repairability of vehicle as it appears that there may be extensive collateral damage to trans, engine as well as other internal damage currently unseen. Open items include engine and additional mechanical problems, and I do not recommend repairing this vehicle.

This vehicle is not repairable.
